

# CIPRNet

Critical Infrastructure Preparedness and Resilience Research Network

## Sistemi innovativi e gestione delle crisi delle Infrastrutture critiche: il progetto EU CIPRNet

Vittorio ROSATO

ENEA Centro Ricerche Casaccia, Roma

vittorio.rosato@enea.it

Workshop "Innovation in Security", Università Campus Biomedico, Roma, 18 Novembre 2016

TLP:  
Amber

# Agenda

1. CIPRNet : Critical Infrastructure Preparedness and Resilience Research Network
2. CIPCast: un Sistema di Supporto alle Decisioni per l'Analisi del Rischio sulle Infrastrutture Critiche
  - a. Workflow
  - b. Funzionalità
3. Visione sul lungo termine
4. Conclusioni

# Infrastrutture Critiche(CI)

## CI

- sono complesse
- dipendono le une dalle altre (dipendenza e interdipendenza)
- hanno dimensione e rilevanza trans-nazionale
- cambiano continuamente (nuovi tratti, tecnologie)
- sono gestite da operatori (pubblici o privati) in competizione industriale
- forniscono servizi vitali ai cittadini

CI formano un **sistema di sistemi**

# CIPRNet

## CIPRNet Facts

**Critical Infrastructures Preparedness and Resilience Research Network**

Scientific domain: **Critical Infrastructure (CI) Protection (CIP)**

Co-funded by: **EU FP7**

Instrument: **Network of Excellence (NoE)**

Start date / duration: **March 1, 2013 / 48 months**

Participants: **12**

PM: **558**

Funding **6,57 million euros**

# CIPRNet – Partnership

1. Fraunhofer IAIS, DE (Coord.)

2. **ENEA, IT**

3. TNO, NL

4. UIC, FR

5. CEA, FR

6. **Joint Research Centre Ispra, EU**

7. Deltares, NL

8. University of Cyprus, CY

9. University of Technology and Life Sciences, PL

10. **Università Campus Bio-Medico di Roma, IT**

11. University of British Columbia, CA

12. ACRIS GmbH, CH

# CIPRNet: nuovi strumenti

## Decision Support System (CIPCast)

with added-value for emergency management and CI operators

## *what if* analysis/fMS&A (CIPRTrainer)

based on federated modelling, simulation & analysis and consequence analysis

## Secure design of NGI

Next Generation Infrastructures (Smart Grids et.)

## Demonstrate timely, actionable, risk-informed CIP analyses

- 1) Ask the expert and CIPedia©
- 2) Demonstrating new capabilities at an exercise

VCCC

# CIPRNet: il DSS CIPCast

- **CIPcast: Decision Support System (DSS)** per il supporto di Operatori e Emergency Managers
- CIPCast consente di avere un costante controllo sulle condizioni dello scenario e del possibile stato di rischio delle infrastrutture in termini di
  - Predizione di possibili danneggiamenti
  - Predizione della conseguente perdita di servizio (anche in relazioni a effetti “a cascata”)
  - Stima delle possibili conseguenze al sistema sociale (ai cittadini, alle imprese, ai servizi)
  - Indicazione di possibili strategie per consentire un rapido ed efficiente recovery dei sistemi.

# CIPCast workflow

- Flood risk

Seismic risk

Scale = 1:2M

# Nowcasting

2016-08-31 13:40

# CIPCast: “situational awareness” e scenari di danno

Situazione al 31.1.2014

# CIPCast: Scenario di Impatti

CIPCast converte i danni attesi (di uno o piu' sistemi) nella riduzione attesa dei servizi (anche in base a possibili effetti a cascata) avendo a disposizione (nel DB)

- la struttura e le proprietà delle reti
- La mappatura delle dipendenze tra le reti

Simulando tutta la catena di eventi che si susseguono a valle del danneggiamento (e della conseguente indisponibilità) degli elementi delle infrastrutture.

# Livello di definizione dei modelli

# Livello di definizione dei modelli

$u_i(t)$

CIPCast genera tutti i profili di guasto stimando la durata dei guasti per ciascun elemento coinvolto

# CIPCast: Scenario di Impatto

## Risk Assessment Workflow Manager

Service Manager

B1 - Monitoring of Natural phenomena

B2 - Prediction of Natural disasters and Event Detection

B3 - Prediction of physical harm scenarios

B4 - Estimation of impacts and consequences

B5 - Support of efficient strategies for crisis scenarios

# CIPCast: Analisi delle Conseguenze

In collaborazione con

# CIPRNet: visione di lungo periodo

## Visione di un European Infrastructure Simulation & Analysis Centre (EISAC)

- Supporto della CIP research communities agli end-users (operatori, PA)
- Trasferire conoscenze e tecnologie verso le applicazioni
- Model: NISAC (USA)
- Passi futuri:
  - Progetto CIPRNet: creazione di una Associazione (2E!SAC) (novembre 2016)
  - Progetto RoMA: sviluppo di un sistema per l'area di Roma Capitale e disegno di EISAC-IT
  - Sviluppo e consolidamento di EISAC-IT attraverso nuovi programmi nazionali e/o regionali

# Conclusioni

## Disclaimer

This presentation was derived from the FP7 project CIPRNet, which has received funding from the European Union's Seventh Framework Programme for research, technological development and demonstration under grant agreement no 312450.

The contents of this presentation do not reflect the official opinion of the European Union.
